Hello, I'm Asraf. As an enthusiastic Software Engineer, I thrive on creating seamless web and mobile applications. My journey has equipped me with profound knowledge of both front-end and back-end realms, specializing in leveraging technologies like TypeScript, React, and Node.js to craft user-centric solutions. Driven by curiosity and dedication, I'm always ready for new challenges and continual learning

WORK EXPERIENCE

Bina Cloudtech

Full Stack Developer

January 2023–Present

Kajang, Selangor

- Engineered and sustained 15+ interactive front-end web applications using TypeScript and Next.js, serving over 5,000 daily users.
- Created and implemented GraphQL and REST Api for back-end systems using Nest.js, allowing for seamless integration between front-end and back-end components.
- Developed new features and improvements for both front-end and back-end systems, resulting in enhanced functionality and increased user engagement.
- Collaborate cross-functionally with UI/UX designers, product managers, and fellow developers to align project vision, ensure efficient workflow, and deliver high-quality solutions.

HostAStay

Software Engineer Intern

August 2022–December 2022

Remote

- Contributed to key projects including the 'DE Rantau Digital Nomad Platform,' initiated by MDEC Malaysia, by developing intuitive user interfaces and robust backend APIs, significantly enhancing user engagement and operational efficiency.
- Built user interfaces and backend APIs, contributing to the development of the Property Management System and company website
- Worked under the guidance of the Tech Lead and Senior Software Engineer, learning best practices and contributing to project success.

Freelance

IT Technician

July 2022

Jengka, Pahang

- Installed and configured computer hardware, operating system and application for 20+ users.
- Ensured all computer systems are running smoothly by providing timely maintenance and updates.
- Manage computer cable.
